Contributions should be sent to one of the editors:

G.J. HOYTINK

Editor of Chemical Physics Letters
Department of Chemistry
The University
Sheffield S3 7HF, England

L. JANSEN

Associate Director
Battelle Institute, Advanced Studies Center
7 route de Drize
Carouge-Geneva, Switzerland

or, preferably, to one of those members of the Advisory Editorial Board who is familiar with the research reported. Authors from the USA and Canada should clearly indicate on the envelope "First Class Mail" in order to prevent any possible delay in the mail. Instructions to authors are to be found on the last page of each volume.

Chemical Physics Letters is published semi-monthly. The subscription price per volume is Dfl. 120.00 per volume excluding Dfl. 8.00 postage.

Subscriptions should be sent to the publisher: NORTH-HOLLAND PUBLISHING COMPANY, P.O. Box 211, Amsterdam, The Netherlands, or to any subscription agent or bookseller.

MASTER INDEX OF VOLUMES 11 – 20

Abeledo, C.R., R.B. Frankel and A. Misetich, Analysis of hyperfine interactions of Fe^{2+} in FeF_2 , MnF_2 and ZnF_2	14 (1972) 561
Abouaf-Marguin, L. and H. Dubost, Infrared spectra of NH_3 trapped in a neon matrix. Evidence for rotation and inversion	15 (1972) 445
Abouaf-Marguin, L., see H. Dubost	17 (1972) 269
Abraham, F.F., An estimate for the replacement entropy of microcrystallites	15 (1972) 287
Absar, I. and J.R. van Wazer, An approximation for gaussian d-orbital exponents of second-row atoms for LCAO MO SCF studies	11 (1971) 310
Achiba, Y., S. Katsumata and K. Kimura, Ionic photodissociation and ionic photosensitized dissociation of charge-transfer complexes	13 (1972) 213
Achiba, Y. and K. Kimura, Mechanism of photoinduced anion formation of pyromellitic dianhydride in n-donor solvents	19 (1973) 45
Acker, B.D., see C.H. Dugan	14 (1972) 190
Ackerman, R.A., J.N. Pitts Jr. and R.P. Steer, Concerning the effect of pressure on the rate of reaction of $\text{O}_2(^1\Delta_g)$ with tetramethylethylene	12 (1972) 526
Adams, D.B., see D.T. Clark	13 (1972) 439
Adams, J., see W. Haas	14 (1972) 95
Adams, J.T., see J.M. Bowman	20 (1973) 229
Adams, W.H., Least distorted localized orbital self-consistent field equations	11 (1971) 71
Adams, W.H., On the solution of the Schrödinger equation in terms of wavefunctions least distorted from products of atomic wavefunctions	11 (1971) 441
Adams, W.H., Distortion of interacting atoms and ions	12 (1971) 295
Ady, E. and J. Brickmann, Non-empirical calculations on the intramolecular rearrangement in the dimer of formic acid	11 (1971) 302
Agrawal, S.K., see S.C. Jain	14 (1972) 211
Ahlrichs, R., Asymptotic behaviour of atomic bound state wavefunctions	15 (1972) 609
Ahlrichs, R., Comments on the convergence of the ordinary Rayleigh–Schrödinger perturbation expansion	18 (1973) 67
Ahlrichs, R., Asymptotic behaviour of molecular bound state wavefunctions	18 (1973) 521
Ahlrichs, R., Structure of beryllium boron hydrides BeBH_5 and BeB_2H_8	19 (1973) 174
Airey, J.R., see T.A. Cool	20 (1973) 67
Akaishi, S., see N. Tamamoto	15 (1972) 458
Akimoto, H., B.J. Finlayson and J.N. Pitts Jr., Chemiluminescent reactions of ozone with hydrogen sulphide, methyl mercaptan, dimethyl sulphide and sulphur monoxide	12 (1971) 199
Akimoto, H., see B.J. Finlayson	12 (1972) 495
Aksela, S. and M. Karras, Sulphur $K\beta$ X-ray emission spectra of SO_3^{2-} and SO_3F^- ions	20 (1973) 356
Albat, R. and N. Gruen, Examples of known SCF procedures which do not satisfy all necessary conditions for the energy to be stationary	18 (1973) 572
Albrecht, A.C., see F. Douglas	14 (1972) 150
Albrecht, A.C., see R. Mathies	16 (1972) 231
Albritton, D.L., see W.C. Richardson	12 (1971) 349
Al-Chalabi, A.O., see M.D. Lumb	11 (1971) 365
Al-Chalabi, A.O., see M.A. Slifkin	18 (1973) 176

Al-Chalabi, A.O., see M.A. Slifkin	20 (1973) 211

NOTE TO AUTHORS

The average letter to be published should not exceed 2000 words (8 typewritten pages and two or three figures). Particular attention will be given to:

- a) the originality of the research to be published;
- b) the desirability of speedy publication;
- c) the clarity of the presentation and the consistency of the conclusions derived.

The editors reserve the right to edit contributions, whenever necessary, and to refuse papers which in their opinion do not satisfy conditions as to standard or contents.

Colleagues working in the field who are preparing letters within the scope of the journal are cordially invited to submit them for publication.

Every paper submitted will be refereed.

Contributions should be sent to one of the editors or, *preferably, to one of those members of the advisory editorial board who is most familiar with the research reported.* The last procedure will speed up the publication considerably.

Manuscripts should be written in English. They should be submitted in three-fold, of which one is the typewritten original, with a wide margin and ample spaces between the lines.

Letters should be provided with a short abstract in English not exceeding 40 words.

All references must be numbered, put at the end of the paper, and should contain the names and initials of all authors. References should not contain footnotes.

Figures should normally be lettered in such a way that they can be reduced to one-column width ($7\frac{1}{2}$ cm).

Figures should be sharp glossy prints of about manuscript size or, preferably, original drawings.

Contributors are reminded that, once their contribution has been accepted for publication, all further correspondence *should be sent directly to the publishers and not to the editors.* (Editorial Department, North-Holland Publishing Company, P.O. Box 103, Amsterdam, The Netherlands).

All proofreading will be done by the publishers; no proofs will be sent to the authors.

Publication scheme

Chemical Physics Letters will appear on the 1st and the 15th of each month.

Page charge and reprints

There will be *no* page charge. Reprints may be ordered from the publisher; an order form is sent to contributors upon acceptance of their communications.

**A journal devoted to experimental
and theoretical research involving problems of
both a chemical and a physical nature**

The journal publish experimental and theoretical papers on all aspects of Chemical Physics. Experimental papers must be brought into relation with theory, and theoretical papers must demonstrate their relation to present or future experiments.

INVITATION TO AUTHORS

The Editors cordially invite colleagues to submit papers within the scope of the journal. There will be no page charge. All papers will be refereed.

Contributions should be submitted preferably to one of the Editors. The original figures and three copies of the manuscript are required. Contributions may also be submitted to a member of the Advisory Editorial Board who is familiar with the research presented, in which case two copies plus the original figures are to be sent concomitantly to one of the Editors.

Manuscripts should be presented in English and accompanied by an English abstract of about 100 words. They should be written in a concise style. The illustrations should be original figures, and the lettering should be sufficiently large to remain legible after the reduction by the printer.

PUBLICATION SCHEDULE

One volume consists of 4 issues of about 100 pages.
Volumes 3 - 5 are scheduled to appear in 1974.
Volumes 1 and 2 (1973) are still available.

SUBSCRIPTION INFORMATION

1974 - Volumes 3 - 5
Total subscription price: Dfl. 333.00 (about US\$ 133.20) including postage and handling.

Free Specimen Copies are available upon request from the Publisher.

fast ion transport in solids

solid state batteries and devices

Proceedings of the NATO Sponsored Advanced Study Institute, Belgirate, Italy, 5-15 September 1972

*Edited by W. van GOOL, University of Utrecht,
The Netherlands*

1973. 744 pages. Dfl. 130.00 (about US \$ 50.00)
ISBN 0 7204 0223 9

Although solid electrolytes have been studied for many years, the present upsurge of interest is based upon some interesting new results. Solid materials with ionic conductivities comparable to that of liquid electrolytes imply the possibility of all solid-state batteries. In other applications these super ionic conductors play a unique role.

The basic aspects of the field are treated in 23 teaching contributions covering solid state battery systems, solid electrolytes, general aspects of diffusion in solids and special aspects of anomalously fast diffusion, experimental techniques, interfacial phenomena, diffusion in glasses, silver compounds, β Al_2O_3 , and some promising new materials. These teaching papers provide a comprehensive introduction to the subject.

Related to the teaching contributions many research papers are included, which contain interesting new results. Teaching papers, research contributions and discussion reports together give a timely review of the subject with many suggestions for future research. Both the newcomer in the field as well as the experienced scientist will find relevant information. The Proceedings can be used for advanced courses in electrochemical engineering and materials science.

CONTENTS:

General Introduction. Fast Diffusion in Solids. Experimental Methods. Interfacial Phenomena. Discussion Session. β Al_2O_3 . Silver Containing Batteries and Electrolytes. Promising New Materials. Survey and Conclusions.
